

Hungarian Megalosauroid Dinosaur, 2020

Scetesuchus meaning (Scete Crocodile) is a genus of afrovenatorine megalosauroid dinosaur, 3 fossils were found of it, a frontal piece (3cm), a lacrimal piece (4cm), and a jugal piece (4cm), the fossils belonged to baby individuals. Scetesuchus lived in Hungary. The fossils are unfortunately now lost. They were found in 2020.05.08. Only one species described, Scetesuchus mirzadensis.

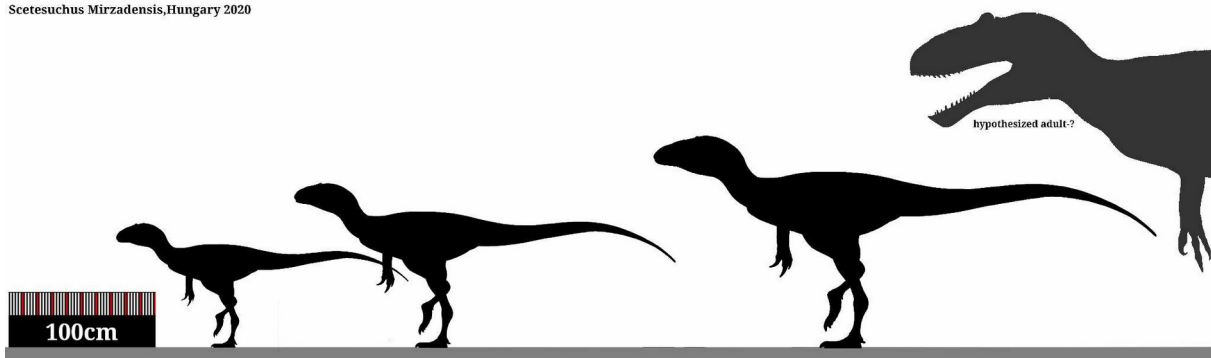

Skull reconstruction of the baby individual with pinned fossil parts.

Scetesuchus Mirzadensis, Hungary 2020 material:

The growth stage of the Scetesuchus (possibly). Judging by the fossils size.

Scetesuchus Mirzadensis, Hungary 2020

Growth stage with the hypothesized adult.

Drawing of Scetesuchus. (Possible reconstruction).
